

**Solve by graphing. Check the solution.**

1.  $y = -4x + 5$

2.  $y = x + 6$

3.  $y = -3x + 7$

4.  $y = 4x - 3$

$y = 3x - 9$

$y = -2x$

$y = 2x - 3$

$y = -2x + 9$

5.  $3x - 2y = 4$

6.  $3x - 2y = 6$

7.  $x + 3y = 6$

8.  $x + y = 4$

$y = -2x + 5$

$x - y = 2$

$x - 3y = 6$

$2x - 2y = 10$
