

Read the **essay** about owls. Then answer the questions.

Many people have never seen an owl in the wild. That's because owls are usually quiet and motionless as they roost during the day. It is at night that they become active, for this is when they hunt for their prey.

Owls are well equipped for hunting. Their huge eyes can see well in the dark, and their hearing is very sensitive. Soft-fringed feathers on their wings help them fly so quietly that most animals don't hear them coming. To catch and carry their prey, owls have needle-sharp claws called talons. Owls usually swallow their prey whole. Parts that can't be digested—hair, teeth, feathers, and bones—are spit up in pellets.

Name four things that help the owl hunt its prey.

1. _____
2. _____
3. _____
4. _____

What happens to the parts of the prey that the owl's stomach can't digest?

Name _____

Making Change

When you do not have the exact change to buy something at a store, the clerk must give you change. The first amount of money is what you give the clerk. The second amount is what the item costs. In the box, list the least amount of coins and bills you will receive in change. Write your own problems in boxes 9 and 10.

| | Amount I Have | Cost of Item | Change |
|----|---------------|--------------|--------|
| 1 | \$3.75 | \$3.54 | |
| 2 | \$10.00 | \$5.63 | |
| 3 | \$7.00 | \$6.05 | |
| 4 | \$6.50 | \$7.25 | |
| 5 | \$7.50 | \$6.13 | |
| 6 | \$0.75 | \$0.37 | |
| 7 | \$7.00 | \$6.99 | |
| 8 | \$15.00 | \$12.75 | |
| 9 | | | |
| 10 | | | |
